Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5, 7-14 and 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Baur. Baur shows a folding chair (1), comprising. (a) a seat (3) defining a top sitting area adapted for supporting a user in a sitting position ; (b) a back (5') extending outwardly from the seat in an open chair position, and defining a back support area for engaging a back of the user; (c) a hinge (7) connecting the seat and the back whereby at least one of the seat and back is moveable from the open chair position to a closed chair position, and in the closed chair position, the back support and sitting areas reside in overlying relation within a common perimeter', and (d) means (9) for securing the common perimeter against entry of outside elements such that the back support and sitting areas remain clean when the chair is returned to the open chair position. Baur shows the use of a recess (8) formed in the seat and back which is adapted to receive a seat cushion (3') or back cushion (6) respectively. Baur shows that the securing means comprises an annular rim formed on the seat which inherently receives a mouth/channel of the recess of the back.

Allowable Subject Matter

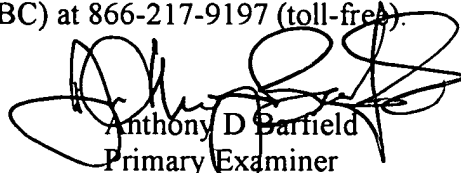

3. Claims 6 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable over the prior art made of record if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reference Nos 3,964,790 and 3,55,242 show features of the claimed invention.
